**SUBJECT: ADMINISTRATIVE CLOSURE OF LICENSE AMENDMENT APPLICATION DATED
JULY 29, 2021 FOR LIBERTY HOSPITAL**

Dear Dr. Caresio:

We have reviewed your license amendment request dated July 29, 2021 for a U.S. Nuclear Regulatory Commission (NRC) license, License No. 24-16178-01, for Liberty Hospital. You have requested to delete depleted uranium listed in Item 6.E. of the license. Your application is available electronically from the Agencywide Documents Access and Management System (ADAMS) at Accession No. ML21218A055.

Based on the review, our office determined that additional information was needed from you to continue review of your license amendment request. The amendment request was insufficient information to determine if depleted uranium was acquired, possessed, used and properly disposed of. Accordingly, we prepared and sent Ms. Julie Osbahr, Director of Radiology, a written request for additional information via electronic mail on October 13, 2021. To date, additional information has not been provided to our office. Therefore, we have administratively closed your amendment application due to the lack of response to our request for additional information.

Note that if you resubmit this request with complete supporting information at a later date, you may refer to Control No. 628105.

In accordance with Title 10 of the *Code of Federal Regulations* (10 CFR) 2.390 of NRC's "Rules of Practice and Procedure," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from ADAMS, accessible from the NRC Web site at <https://www.nrc.gov/reading-rm/adams.html>.

If you have any questions, please contact me at 630-829-9623 or frank.tran@nrc.gov.

Sincerely,

Frank P. D. Tran
