

# PRA Counterpart Meeting

**Antonios M. Zoulis, Branch Chief**  
PRA Oversight Branch, DRA, NRR

November 2021

# Updating & Benchmarking SPAR Models

---

Benchmarking against the licensee's models allows the SPAR models to reflect the as-built, as-operated plants

---

Increased use of risk insights highlights the need to maintain the plant-specific PRA tools to support licensing and inspection activities

---

Differences due to outdated models could lead to additional time/resource needed during oversight or licensing

---

Voluntarily provide PRA information to support INL and NRC updating of the SPAR models
