Bob and Tammy –

Attached is the notification from Fred Weber, Inc., that they have had no principal activities for a period exceeding 2 years. While he states that he emailed it and mailed a hard copy, I checked with Tammy and was told she hasn't seen it yet. As such, here's what he sent me today.

Enclosed is the inspection report for the NRC's remote inspection performed November 2-4, 2021, of your portable gauge license. As we discussed, one violation was identified concerning the failure to notify the NRC within 60 days when no principal activities had been performed under the license for a period of two years.
