Amy,

You requested locations of use at Redstone and INL. Please provide me with some descriptions of these locations so I can understand why you want them added as permanent locations instead of temporary job sites. Let me know if these locations are intended for all licensed materials or if you are limiting what may be used at these locations. Also, provide enough description so it is clear that there are specific locations at those sites that will be under your license jurisdiction, and not in conflict with other NRC licenses or DOE jurisdiction.

Thanks,
Betsy
