Dear Casey Alldredge – USNRC;

I apologize for the confusion.

Worthington, Lenhart & Carpenter Inc.(WLC) is in receipt of your request for information dated 11/12/2021 via email. Thank you for review WLC's NRC License No. 49-27067-01. Please note WLC's responses are in Blue Text.

From Casey's email

1. Could you please confirm if you would like authorization to work/store material at temporary job sites? WLC would like authorization to work/store material at temporary job sites after first verifying the public safety of a temporary storage location via a location map and public dose calculations for our records.
2. Could you please confirm which of these statements that you are committing to? There appeared to be a checkmark/slash on both options in your submittal.
 - a. We will maintain, for inspection by the NRC, documentation demonstrating that unmonitored individuals are not likely to receive a radiation dose in excess of the limits in 10 CFR 20.1502(a). WLC does this as part of annual review. However, WLC will commit to 2b., below.
OR
WLC will commit to the Statement below for monitoring occupational individuals.
 - b. We will provide and require the use of individual monitoring devices (dosimetry). All personnel dosimeters that require processing to determine the radiation dose will be processed and evaluated by a NVLAP-approved processor.
3. Could you please confirm which of these statements that you are committing to? There appeared to be a checkmark/slash on both options in your submittal.
 - a. We will implement and maintain the operating, emergency, and security procedures in Appendix G to NUREG-1556, Vol. 1, Rev. 2, "Consolidated Guidance About Materials Licenses: Program- Specific Guidance About Portable Gauge Licenses." Copies of these procedures will be provided to all gauge users and will be available at each jobsite.

CASPER

RAWLINS

DEDICATED TO CLIENTS. DEFINED BY EXCELLENCE.

OR

WLC will commit to the Statement below.

- b. Operating, emergency, and security procedures will be developed, implemented, and maintained and will meet the criteria in section 8.10.6, "Radiation Safety Program— Operating, Emergency, and Security Procedures," NUREG-1556, Vol. 1, Rev. 2, "Consolidated Guidance About Materials Licenses: Program- Specific Guidance About Portable Gauge Licenses." Copies of these procedures will be provided to all gauge users and will be available at each jobsite.

Hopefully this helps, and again, I apologize for the confusion.

Please let me know if you need anything else.

Thank you and have a great day life.

Best regards,

A handwritten signature in blue ink that reads "Gregory L. Biggs". The signature is written in a cursive style with a large, sweeping flourish at the end.

Gregory L. Biggs
WLC Treasurer, R.S.O.

Subject: Worthington, Lenhart & Carpenter NRC License Renewal Request for Information

Good afternoon Mr. Biggs,

I am reviewing your application for the renewal of NRC License No. 49-27067-01 and I have a few questions. Could you please provide the answers to the following in a signed letter? You can attach that letter to an email if it that is easiest.

Also, please note that your submittal talked about a change in the ownership structure of the company. Our Regional Counsel has determined that the restructure does not qualify as a change of control. I will note that in the final renewal paperwork as well, but I wanted to let you know ahead

of time.

1. Could you please confirm if you would like authorization to work/store material at temporary job sites?
2. Could you please confirm which of these statements that you are committing to? There appeared to be a checkmark/slash on both options in your submittal.
 - a. We will maintain, for inspection by the NRC, documentation demonstrating that unmonitored individuals are not likely to receive a radiation dose in excess of the limits in 10 CFR 20.1502(a).
OR
 - b. We will provide and require the use of individual monitoring devices (dosimetry). All personnel dosimeters that require processing to determine the radiation dose will be processed and evaluated by a NVLAP-approved processor.
2. Could you please confirm which of these statements that you are committing to? There appeared to be a checkmark/slash on both options in your submittal.
 - a. We will implement and maintain the operating, emergency, and security procedures in Appendix G to NUREG–1556, Vol. 1, Rev. 2, “Consolidated Guidance About Materials Licenses: Program- Specific Guidance About Portable Gauge Licenses.” Copies of these procedures will be provided to all gauge users and will be available at each jobsite.
OR
 - b. Operating, emergency, and security procedures will be developed, implemented, and maintained and will meet the criteria in section 8.10.6, “Radiation Safety Program— Operating, Emergency, and Security Procedures,” NUREG–1556, Vol. 1, Rev. 2, “Consolidated Guidance About Materials Licenses: Program- Specific Guidance About Portable Gauge Licenses.” Copies of these procedures will be provided to all gauge users and will be available at each jobsite.

If you have any questions or concerns, please feel free to reach out via email or at 817-200-1546.

Thanks,

Casey Alldredge
