Thanks for sending the link. I looked over the report. I have to say, I have been pondering this issue for a long time and I'm still not sure if shutting down our nuclear plants is the best option right now. What we need to do first is cut demand and put green alternatives in place. Taking nuclear out of the picture before we are able to replace our dirty coal and gas generation would not be wise in my opinion. So, I guess after all is said and done, I concur with the decision of the commission at this time. I believe that the last old-school generating facilities to be decommissioned should be the nuclear facilities. Maybe by then, we'll have fusion power.

This direct link to the document in ADAMS should work:

<https://adamswebsearch2.nrc.gov/webSearch2/main.jsp?AccessionNumber=ML21306A226>

If not, the Draft EIS will appear on the public website tomorrow and I can email you that link.

I attempted to view this document and was unable to locate it on the ADAMS website. Several searches offered no results.

Good afternoon,

The U.S. Nuclear Regulatory Commission (NRC) has issued the Draft plant-specific Supplement 23, Second Renewal, to the Generic Environmental Impact Statement (GEIS) for License Renewal of Nuclear Plants, NUREG 1437, regarding the Point Beach Nuclear Plant, Unit Nos. 1 and 2 (Point Beach). The Draft Supplemental Environmental Impact Statement for Point Beach Nuclear Plant, Units 1 and 2 is available in the Agencywide Documents Access and Management System (ADAMS) under Accession No. ML21306A226. To access ADAMS, go to <https://www.nrc.gov/reading-rm/adams.html>.

The *Federal Register Notice* announcing the comment period for the Draft EIS will be issued shortly.
