PETITION FOR REVIEW

Pursuant to 42 U.S.C. § 2239, 28 U.S.C. § 2344, 5 U.S.C. § 702, 42 U.S.C. § 10139, Fed. R. App. P. 15(a), and D.C. Cir. Rule 15(a), Petitioner Beyond Nuclear, Inc., through its undersigned counsel, seeks review of the issuance by the United States Nuclear Regulatory Commission (the “NRC” or “Commission”) of a license to build and operate the WCS Consolidated Interim Storage Facility (“License Issuance”). The NRC issued the license on September 13, 2021, and published a notice at 86 Fed. Reg. 51,926 (Sept. 17, 2021).¹

The License Issuance constitutes the NRC’s last action consummating its consideration of a license application by Interim Storage Partners (“ISP”) for

¹ A copy of the Federal Register notice is attached.

construction and operation of a facility to store “spent” or used nuclear reactor fuel. Petitioner seeks review of the License Issuance on the grounds that by approving the issuance of a license to ISP, and by refusing to dismiss the licensing proceeding at its inception, the NRC violated the Nuclear Waste Policy Act (“NWPA”), 42 U.S.C. §§ 10222(a)(5)(A) and 10143, and the Administrative Procedure Act (“APA”), 5 U.S.C. §§ 706(2)(A) and (C).²

Accordingly, Petitioner respectfully requests this Court to review, reverse, and vacate the License Issuance and grant any other remedies that may be appropriate.

This filing is timely because it is made within the 60-day period established by the Hobbs Act, 28 U.S.C. § 2344, for bringing a petition for judicial review of a final agency action. The License Issuance was noticed within the last 60 days, and

² Petitioner notes that this Petition for Review is intended to substitute for an Amended Petition for Review of the same License Issuance, filed by Petitioners on November 4, 2021 in *Beyond Nuclear v. NRC*, No. 21-1056 (consolidated with Nos. 21-1048, 21-1055, and 21-1179 under the caption *Don’t Waste Michigan, et al. v. NRC*, No. 21-1048). This Petition for Review is being filed in an abundance of caution, in response to a question raised by the court in *Don’t Waste Michigan, et al.* of whether a new Petition for Review of the License Issuance is necessary to obtain review of that decision. Order at 1 (Nov. 10, 2021). In light of the statutory 60-day limit on petitions for review in the Hobbs Act, 28 U.S.C. § 2344, Petitioners are submitting this Petition for Review now. In a separate notice, Petitioner will withdraw the Amended Petition for Review from that proceeding. In the coming week, Petitioner also plans to seek consolidation of this Petition for Review with *Don’t Waste Michigan, et al.*

renders final and ripe all other orders issued against Beyond Nuclear in the underlying proceeding. Venue is appropriate within the D.C. Circuit pursuant to 28 U.S.C. § 2343.

NUCLEAR REGULATORY COMMISSION

[Docket No. 72-1050; NRC-2016-0231]

Interim Storage Partners, LLC; WCS Consolidated Interim Storage Facility; Issuance of Materials License and Record of Decision

AGENCY: Nuclear Regulatory Commission.

ACTION: License and record of decision; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) has issued Materials License No. SNM-2515 to Interim Storage Partners, LLC (ISP) to construct and operate the WCS Consolidated Interim Storage Facility (CISF) as proposed in its license application, as amended, and to receive, possess, store, and transfer spent nuclear fuel and Greater-than-Class-C radioactive waste at the WCS CISF in Andrews County, Texas. ISP will be required to operate under the conditions listed in Materials License No. SNM-2515. The NRC staff has published a record of decision (ROD) that supports the NRC's decision to approve ISP's license application for the WCS CISF and to issue the license.

DATES: September 17, 2021.

SUPPLEMENTARY INFORMATION:

I. Discussion

The NRC has issued a license to ISP for its WCS CISF in Andrews County, Texas (ADAMS Package Accession No. ML21188A096). Materials License No. SNM-2515 authorizes ISP to construct and operate its facility as proposed in its license application, as amended, and to receive, possess, store, and transfer spent nuclear fuel, including a small quantity of mixed-oxide fuel, and Greater-than-Class-C radioactive waste at the WCS CISF. The license authorizes ISP to store up to 5,000 metric tons of uranium [5,500 short tons] of spent nuclear fuel for a license period of 40 years. ISP will be required to operate under the conditions listed in Materials License No. SNM-2515.

The NRC staff's ROD that supports the NRC's decision to approve ISP's license application for the WCS CISF and to issue Materials License No. SNM-2515 is available in ADAMS under Accession No. ML21222A214. The ROD satisfies the regulatory requirement in section

51.102 paragraph (a) of title 10 of the *Code of Federal Regulations* (10 CFR), which requires that a Commission decision on any action for which a final environmental impact statement (EIS) has been prepared be accompanied by or include a concise public ROD. As discussed in the ROD and the final EIS for ISP's license application for a CISF for spent nuclear fuel in Andrews County, Texas (ADAMS Accession No. ML21209A955), the NRC staff considered a range of reasonable alternatives that included the No-Action alternative, as required by the National Environmental Policy Act of 1969, as amended; storage at a government-owned CISF; alternative design and storage technologies; and alternative locations. The final EIS documents the environmental review, including the NRC staff's recommendation to issue an NRC license to ISP to construct and operate a CISF for spent nuclear fuel at the proposed location, subject to the determinations in the NRC staff's safety review of the application. The final EIS conclusion is based on the NRC staff's independent environmental review, as well as (i) the license application, which includes the environmental report and supplemental documents and ISP's responses to the NRC staff's requests for additional information; (ii) consultation with Federal, State, Tribal, and local agencies and input from other stakeholders, including members of the public; and (iii) the assessments provided in the final EIS.

The NRC staff prepared a final safety evaluation report that documents the staff's safety and security review of the application (ADAMS Accession No. ML21188A101). The staff's safety and security review found that the application met applicable NRC regulations in 10 CFR part 72, "Licensing Requirements for the Independent Storage of Spent Nuclear Fuel, High-Level Radioactive Waste, and Reactor-Related Greater than Class C Waste."

Documents related to the application carry Docket ID NRC-2016-0231. These documents for the ISP license include the license application, the applicant's safety analysis report, emergency plan, physical security plan, environmental report, updates to these documents, and applicant supplements and responses to NRC staff requests for additional information, and the NRC staff's final

safety evaluation report, final EIS, and ROD.

ISP's request for a materials license was previously noticed in the **Federal Register** on November 14, 2016 (81 FR 79531). A notice of docketing with an opportunity to request a hearing and to petition for leave to intervene was published in the **Federal Register** on January 30, 2017 (82 FR 8773). Four groups of petitioners filed petitions to intervene. An Atomic Safety and Licensing Board considered petitions and admitted one contention. The Board subsequently dismissed the contention as moot after ISP supplemented its application with information that the contention had noted was missing, and the Board subsequently terminated the adjudicatory proceeding. Intervenor's appealed the decisions to the Commission, and the Commission affirmed the Board decisions, with one new contention remanded to the Board for consideration. The Board subsequently dismissed the remanded contention, and the Commission denied an appeal of the Board decision.

In issuing a materials license to ISP for the WCS CISF, the NRC has determined based on its review of this application that there is reasonable assurance that: (i) The activities authorized by the license can be conducted without endangering the health and safety of the public; and (ii) these activities will be conducted in compliance with the applicable regulations of 10 CFR part 72. The NRC has further determined that the issuance of the license will not be inimical to the common defense and security.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," the details with respect to this action, including the final safety evaluation report and accompanying documentation and license, are available electronically in the ADAMS Public Documents collection at <https://www.nrc.gov/reading-rm/adams.html>. From this site, you can access ADAMS, which provides text and image files of the NRC public documents.
