Based on Joyce Stanley's report (she is the Regional Environmental Officer for the United States Department of the Interior), I think a ten year license is needed so the CFFF can address the many concerns she states.

Her report is titled DEIS-Columbia Fuel Fabrication in Richland County, SC (NUREG-2248).

Among her many concerns is an existing sub-surface contamination plume from CFFF that could have potential impacts to the Congaree National Park and the Congaree River. The Congaree River is an NRI river and "all federal agencies must seek to avoid or mitigate actions that would adversely affect NRI rivers". She further states that "there needs to be a monitoring protocol to detect and understand contaminant behavior in a dynamic flood plain ecosystem".

She cites long-term development in the area, climate change and flood forecasts as other issues that need to be addressed. There is much more in her seven page report.

Thank you for your consideration.

Sincerely,
Elizabeth Weems, a concerned citizen
