SUBJECT: OCONEE NUCLEAR STATION, UNITS 1, 2 AND 3 - SUMMARY OF THE ENVIRONMENTAL REMOTE AUDIT RELATED TO THE REVIEW OF THE SUBSEQUENT LICENSE RENEWAL APPLICATION (EPID NUMBER: L-2021-SLE-0002)

A review team consisting of staff from the U.S. Nuclear Regulatory Commission (NRC or the staff) participated in a remote audit during the week October 11, 2021, for Oconee Nuclear Station, Units 1, 2 and 3 (Oconee), as part of the subsequent license renewal application environmental review. The goal of the audit was to gather information to ensure that the environmental requirements for subsequent license renewal, as codified in Title 10 of the *Code of Federal Regulations* Part 51, were met. A letter dated September 21, 2021 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML21263A031) was sent containing an audit plan.

An entrance meeting was held on October 12, 2021, to introduce participants and discuss audit logistics. During the remainder of the audit, the NRC staff participated in smaller groups (breakout sessions) with Duke Energy Carolinas, LLC. (Duke Energy) and Enercon Services, Inc. (Enercon) representatives to address the audit needs identified in the audit plan. The enclosure to this letter provides a list of representatives from the NRC, Duke Energy, and Enercon who participated in the audit.

At the conclusion of the audit, the NRC staff summarized the status of the review with Duke Energy and Enercon representatives during the exit meeting held on October 18, 2021. Many of the NRC's questions identified in the audit plan or during the audit were answered through the conduct of the audit. Those that were answered but would be needed to be used in the site-specific Supplemental Environmental Impact Statement will be submitted (a) as supplement to the application, (b) as responses to requests for additional information (RAI), or (c) as responses to requests for confirmation of information.

While the NRC staff did not identify any significant environmental issues during this audit, the staff indicated that the environmental review was ongoing and that any additional information necessary to support the review would be formally requested via the RAI process, during the course of the review.

S. Snider
