REGION III
2443 WARRENVILLE RD. SUITE 210
LISLE, IL 60532-4352

November 19, 2021

Craig W. Barnhart
Radiation Safety Officer
Butler University
4600 Sunset Avenue
Indianapolis, IN 46208

Dear Mr. Barnhart:

Enclosed is Amendment No. 28 to your NRC Material License No. 13-01865-02 in accordance with your request dated August 25, 2021.

This amendment places your licensed program in standby status, and the license must be amended prior to any use of licensed material. This amendment also removes Katherine Schmid, Ph.D. as an authorized user. Please note that to fully resume your licensed program a qualified authorized user for each byproduct material will need to be named on the license. If there are byproduct materials authorized on your license that are no longer in use under your program an amendment request may be submitted to have them removed from the license. Additionally, Condition 16, as described on Amendment No. 27, has been removed from the license as transportation requirements are fully described in 10 CFR Part 71.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

In accordance with Title 10 Code of Federal Regulations 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

Laura B. Cender
