| Pending NRC License Amendment Request - Additional Information Required | | | | |
| SUMMARY AND ACTION REQUIRED (IF ANY) This is a record of the conversation between Laura Cender and Craig W. Barnhart regarding the pending NRC license amendment request dated August 25, 2021. Please provide your response to the following items by no later than Friday, November 5, 2021. | | | | |
| <ol style="list-style-type: none"> 1. Please provide a description of the licensed material possessed and indicate if you possess any sealed sources/devices. If sealed sources/devices are possessed provide the manufacturer, model number, serial number, isotope, activity, and date of last leak test. 2. Identify who will be responsible for maintaining control of the licensed material while it is in storage. The individual's training and experience should include knowledge of basic radiation safety practices and the regulatory requirements associated with the material being stored. 3. Please describe your accountability program for assuring that the licensed remains in secure storage and is not used (inventory at least annually). 4. Please indicate if there will be any planned changes to your radiation safety program as a result of placing the licensed material in storage. Changes may include, but are not limited to dosimetry services, worker training programs, instrument calibration services, inventories, internal audits, maintenance and visual inspection of equipment and facilities, and maintenance of records. | | | | |
