

UNITED STATES
NUCLEAR REGULATORY COMMISSION
REGION III
2443 WARRENVILLE RD. SUITE 210
LISLE, IL 60532-4352

December 6, 2021

Steven D. Struck
Radiation Safety Officer
The Curators of the University of Missouri
26 Arnold B. Grobman Dr.
University of Missouri - St. Louis, Facilities
St. Louis, MO 63121-4400

Dear Mr. Struck:

Enclosed is Amendment No. 30 to your U.S. Nuclear Regulatory Commission (NRC) Material License No. 24-00513-38 for The Curators of the University of Missouri in accordance with the licensee's requests dated August 26, 2021 and received October 26, 2021. Please note that we revised the Authorized Use in Item 9.H. based on information as documented in your letter dated December 3, 2021. Further, we did not change the name of the Radiation Safety Officer at this time as we await further information.

Amendment No. 30 to your NRC license No. 24-00513-38 was generated using a new Web Based Licensing (WBL) System. Additionally, we have deleted Condition No. 19 in accordance with current NRC policy to include the reference to Title 10 of the *Code of Federal Regulations* (CFR), Part 71, "Packaging and Transportation of Radioactive Material," in the preamble, on page 1 of the license. Further, we have revised and renumbered Condition Nos. 13-19 to reflect the standard WBL language.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the NRC Region III office at (630) 829-9887 so that we may provide appropriate corrections and answers.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. The NRC may issue a notice of violation, imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

In accordance with 10 CFR 2.390, a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from ADAMS, accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

Magdalena R. Gryglak
Health Physicist
