Date: Friday, December 3, 2021 7:48:00 AM

Good morning Mr. Ferris,

Mr. Struck asked to name Dr. Olivas to use the Am-241 plated source. No other information was provided regarding Dr. Olivas' experience using the source.

In the same letter (or a new one), please also describe briefly Dr. Olivas' experience or training in using the source. Has Mr. Struck provided any training before he left? Has she been using the source before (as I understand from our discussion, the university currently is in possession of H-3 and C-14). How long has she been using material? Also, please briefly described what is Am-241 used for. As I understand the purpose of Am-241 did not change.

Thank you
Magdalena
