Quantel USA, Inc.
49 Willow Peak Drive
Bozeman, MT 59718

SUBJECT: TERMINATION OF NRC RADIOACTIVE MATERIALS LICENSE NO. 25-27639-01

On September 14, 2021, you informed the U.S. Nuclear Regulatory Commission (NRC) that you wished to terminate your NRC radioactive materials license. The NRC Form 314 dated September 14, 2021, stated that all radioactive material was transferred to the owner (Aselsan), and to Thomas Gray & Associates (California Agreement State License Number 2105-30).

The supporting documentation to the NRC Form 314 also provided a copy of the latest leak test results. The leak test results document that there was no evidence of leakage of radioactive material from the sealed sources. The NRC staff has reviewed the supporting documentation to your NRC Form 314, including your letters dated December 1, 2021 and December 2, 2021. Based on the documentation submitted, a review of your historical file, and the results of the NRC inspection conducted on August 25, 2021, in which the inspector performed a confirmatory survey of your facility, the staff concluded that all licensable radioactive material has been removed from the facility and the facility located at 49 Willow Peak Drive, Bozeman, Montana, 59718, is suitable for unrestricted use in accordance with 10 CFR 20.1402, "Radiological Criteria for Unrestricted Use." Based on these conclusions, no further remediation or actions with respect to NRC regulated material is required.

Please find enclosed Amendment No. 10 to License No. 25-27639-01 authorizing your license termination. An environmental assessment for this action is not required since this action is categorically excluded under 10 CFR 51.22(c)(20)(ii).

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.
