RSO DELEGATION OF AUTHORITY

Memo to: Site Radiation Safety Officer (MO1)
From: Corporate Radiation Safety Officer
Subject: Delegation of Authority

You, James Coder, have been appointed radiation safety officer (RSO) and are responsible for ensuring the safe and secure use of radioactive materials produced by an accelerator. You are responsible for managing the Radiation Protection Program (RPP); identifying radiation protection problems; initiating, recommending, or providing corrective actions; verifying implementation of corrective actions; stopping unsafe activities; and ensuring compliance with regulations. You are hereby delegated the authority necessary to meet those responsibilities, including prohibiting the use of byproduct material by employees who do not meet the necessary requirements and shutting down operations, when justified, to maintain radiation safety. You are required to notify management if staff does not cooperate and does not address radiation safety issues. In addition, you are free to raise issues with the U.S. Nuclear Regulatory Commission (and/or state equivalent) at any time.

The management and owners of the SOFIE are committed to the ALARA philosophy of maintaining occupational and public radiation dose 'as low as reasonably achievable' as well as maintaining compliance with all applicable radiation regulations. To this end, SOFIE does assign and delegate a specific employee to act as site Radiation Safety Officer (RSO) and hereby assigns to this employee the duties and responsibilities of maintaining compliance with the ALARA philosophy and all applicable NRC, DOT and State radioactive regulations. The delegated site RSO is authorized by the company to ensure adherence to ALARA principles and all applicable regulations. SOFIE gives its full backing and support to the site RSO in instances where this authority must be asserted.

Matthew Hadden, Director Radiation Compliance and EHS
