ITAAC Statement

Design Commitment

4. Safety-related displays of the parameters identified in Table 2.5.5-1 can be retrieved in the MCR.

Inspections, Tests, Analyses

Inspection will be performed for retrievability of the safety-related displays in the MCR.

Acceptance Criteria

Safety-related displays identified in Table 2.5.5-1 can be retrieved in the MCR.

ITAAC Determination Basis

An inspection was performed to verify the safety-related displays of the parameters identified in the Combined License (COL) Appendix C Table 2.5.5-1 (Attachment A) could be retrieved in the main control room (MCR).

The inspection was performed in accordance with the Unit 3 preoperational test procedure and ITP Work Order listed in Reference 1 for Incore Instrumentation System component indication verifications. The test procedures injected a test signal for core exit temperature (CET) and visually confirmed that when each of the safety-related displays for core exit temperature was summoned at the MCR Protection and Safety Monitoring System (PMS) Visual Display Units (VDUs), the summoned core exit temperature appeared on the PMS VDU.

The Unit 3 test results (Reference 1) confirmed that the VEGP Unit 3 plant parameter safety-related displays listed in Attachment A can be retrieved in the MCR.

Reference 1 is available for NRC inspection as part of Unit 3 ITAAC 2.5.05.04 Completion Package (Reference 2).

ITAAC Finding Review

In accordance with plant procedures for ITAAC completion, Southern Nuclear Operating Company (SNC) performed a review of findings pertaining to the subject ITAAC and associated corrective actions. This review found there are no relevant ITAAC findings associated with this ITAAC. The ITAAC completion review is documented in the ITAAC Completion Package for ITAAC 2.5.05.04 (Reference 2) and is available for NRC review.

ITAAC Completion Statement

Based on the above information, SNC hereby notifies the NRC that ITAAC 2.5.05.04 was performed for VEGP Unit 3 and that the prescribed acceptance criteria were met.

Systems, structures, and components verified as part of this ITAAC are being maintained in their as-designed, ITAAC compliant condition in accordance with approved plant programs and procedures.
