To Whom It May Concern:

10 CFR parts 35 and 20 carries with it the requirement that as Radiation Safety Officer and holder of U.S. Nuclear Regulatory Commission license # 21-32502-01, I must annually review the content and implementation of the radiation protection program.

By personal inspection, consultation with and review of reports generated by members of Medical Physics Consultants, Inc. following their visits, and the issuance over my signature of appropriate directives to staff members providing Nuclear Medical Technical and Ancillary Support Services, it can be assured that radiation safety activities are being performed in accordance with approved procedures and regulatory requirements in the daily operation of the radioactive materials program. The scope of this review contains all the items described in 10 CFR parts 35 and 20.

Sincerely,

AMINE M. ZEIN D.O.

Radiation Safety Officer
