Subject: Request for an Extension of the Comment Period for DG-8060, "Monitoring Criteria and Methods to Calculate Occupational Radiation Doses;" Docket ID NRC-2021-0217

Project Number: 689

On behalf of its members, the Nuclear Energy Institute (NEI)¹ appreciates the opportunity to review and provide comments on the draft regulatory guide DG-8060, "Monitoring Criteria and Methods to Calculate Occupational Radiation Doses." This DG is proposed Revision 1 to Regulatory Guide (RG) 8.34 of the same name. In an FRN dated December 17, 2021, the U.S. Nuclear Regulatory Commission (NRC) requested that stakeholder comments be submitted by January 31, 2022. NEI requests an extension of the comment period by 30 days to March 02, 2022. This would allow us time to fully develop and submit comments and manage the response time lost due to the winter holidays.

If you have questions or require additional information, please do not hesitate to contact me. We look forward to NRC's response of this request.

Sincerely,

A handwritten signature in cursive script that reads "Hilary M. Lane".

Hilary Lane

c: Mr. Steven Garry, NRC/NRR
Ms. Harriet Karagiannis, NRC/RES
Mr. Kevin Hsueh, NRC/NRR

¹ The Nuclear Energy Institute (NEI) is responsible for establishing unified policy on behalf of its members relating to matters affecting the nuclear energy industry, including the regulatory aspects of generic operational and technical issues. NEI's members include entities licensed to operate commercial nuclear power plants in the United States, nuclear plant designers, major architect and engineering firms, fuel cycle facilities, nuclear materials licensees, and other organizations involved in the nuclear energy industry.
