Mr. Pugsley:

Thank you for taking my call this afternoon. As we discussed, the NRC's letter dated December 16, 2021 (ADAMS Accession No. ML21349B325), determined that a proposed interim transaction submitted on November 20, 2021 (ADAMS Accession No. ML21334A413) between the companies does not constitute a transfer of control; NRC staff approval is not required for this interim transaction.

NRC approval is required prior to completion of the final transaction described by Powertech in a letter dated October 8, 2021 (ML21286A770). Review of this transaction has not been completed by the NRC staff; the NRC anticipates reaching a decision on this final transaction by February 1, 2022. The public comment and hearing opportunity notices for the October 8, 2021 submission will remain on the website until, at least, January 31, 2022, to meet the requirements of 10 CFR Part 2.

If you have further questions, please feel free to contact me at the number below or Christina England, Acting Deputy Assistant General Counsel for Materials, Fuel Cycle, and Waste Programs at 301-287-9131.

Thank you,

Tison Campbell
Assistant General Counsel
