Subject: [External_Sender] Comments for Docket ID: NRC-2020-0277-0194

I have several comments on the proposed 80 year license extension:

1. This comment comes under the title: Have You Collectively Lost Your Freaking Minds?

80 years!!!! For a reactor that is obsolete and crumbling. Really? Who was bought off? Listen to the scientists who know and warned of the dangers, and the physicians who treat the diseases and disorders caused by both immediate and prolonged exposure to NUCLEAR materials.

2. It is past time that the NRC stop ignoring and pay attention to the comments of the residents living in and around Point Beach as well as the consumers of the water where Point Beach dumps NUCLEAR waste. These people's tax money was and is spent to construct, maintain and keep this decrepit hazard alive. What have they gotten? Very little "return on investment" (energy) and a lot of statistically likely destruction of their health.

3. The NRC has almost two centuries of science on NUCLEAR materials. It is time to stop poring good money after bad into an enterprise that will kill, yes, more slowly than a bullet, but will kill. Listen to the scientists make a plan to disarm, dismantle, and store HAZARDOUS NUCLEAR WASTE. No matter where or how you construct NUCLEAR plants, decommission them, and store the waste, something dreadful WILL happen. PLAN ACCORDINGLY.

Very Sincerely,

Charlotte Sumrow-Pirch
