

SAFETY INSPECTION REPORT AND COMPLIANCE INSPECTION

1. LICENSEE/LOCATION INSPECTED: Great River Associates, Inc. 2826 S. Ingram Mill Rd. Springfield, MO 65804 REPORT NUMBER(S) 2021001	2. NRC/REGIONAL OFFICE Region III U. S. Nuclear Regulatory Commission 2443 Warrenville Road, Suite 210 Lisle, IL 60532-4352
---	---

3. DOCKET NUMBER(S) 030-39256	4. LICENSE NUMBER(S) 24-35621-01	5. DATE(S) OF INSPECTION December 16, 2021
--------------------------------------	---	---

LICENSEE:

The inspection was an examination of the activities conducted under your license as they relate to radiation safety and to compliance with the Nuclear Regulatory Commission (NRC) rules and regulations and the conditions of your license. The inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector. The inspection findings are as follows:

- 1. Based on the inspection findings, no violations were identified.
- 2. Previous violation(s) closed.
- 3. The violation(s), specifically described to you by the inspector as non-cited violations, are not being cited because they were self-identified, non-repetitive, and corrective action was or is being taken, and the remaining criteria in the NRC Enforcement Policy, to exercise discretion, were satisfied.

_____ Non-cited violation(s) were discussed involving the following requirement(s):

- 4. During this inspection, certain of your activities, as described below and/or attached, were in violation of NRC requirements and are being cited in accordance with NRC Enforcement Policy. This form is a NOTICE OF VIOLATION, which may be subject to posting in accordance with 10 CFR 19.11.
(Violations and Corrective Actions)

Statement of Corrective Actions

I hereby state that, within 30 days, the actions described by me to the Inspector will be taken to correct the violations identified. This statement of corrective actions is made in accordance with the requirements of 10 CFR 2.201 (corrective steps already taken, corrective steps which will be taken, date when full compliance will be achieved). I understand that no further written response to NRC will be required, unless specifically requested.

Next Inspection Date (MM/DD/YYYY): December 16, 2026 <input checked="" type="checkbox"/> Normal <input type="checkbox"/> Extended <input type="checkbox"/> Reduced <input type="checkbox"/> No change	

16. Scope and Observations:

This was an announced, initial inspection of a portable nuclear gauge licensee authorized to use and store a portable moisture density gauge at its facility in Springfield, Missouri. The inspection took place at their Commercial St. location. The licensee employed 2 gauge users, one of whom is the Radiation Safety Officer (RSO), and possessed one Humboldt model 5001 gauge, containing a cesium-137 source and an americium-241 source. The licensee does not perform any services or maintenance activities on its gauges; these service were performed by the manufacturer. The licensee uses its gauge year-round.

Performance Observations

The licensee demonstrated how to use the gauge, ALARA practices, and secure gauge during transport and while stored at the main office. The gauge was kept under two barriers while in the office. The licensee had the required shipping papers that contained all appropriate information and demonstrated how the papers are made accessible in the transport vehicle. The RSO demonstrated an adequate level of understanding of emergency and handling procedures during interviews. The inspector reviewed leak test, hazmat training, inventory, dosimetry records, emergency procedures, manufacturer training, and usage logs.

No violations of NRC requirements were identified as a result of this inspection.
