UNIT 1 UFSAR APPENDIX 9.5A – FIRE PROTECTION REPORT

Appendix 9.5A, Amendment 27A, previously contained the Fire Protection Report. This appendix was removed from the UFSAR as a result of the transition of the St. Lucie Fire Protection Program to a new license condition under 10CFR50.48(c) (known as NFPA 805).

If you have been directed to Appendix 9.5A by another Chapter of the UFSAR or another document, please refer to Amendment 27A of Appendix 9.5A maintained in plant records.

10CFR50.48(c) (NFPA 805) Changes

The License Amendment Request (LAR) submitted to the NRC is documented in L-2013-099 and its subsequent RAIs. The (LAR) was approved by the NRC in the safety evaluation “St. Lucie Plant, Units Nos. 1 and 2 – Issuance of Amendments Regarding Transition to a Risk-Informed, Performance-Based Fire Protection Program in Accordance with Title 10 of the Code of Federal Regulations Section 50.48(c),” dated March 31, 2016 (ML15344A346). As committed to in the LAR Table S-2, Item 9, details used in the LAR that originated from the UFSAR are to be carried forward as a Nuclear Record. The record for this commitment is considered to be Amendment 25 of the Unit 1 UFSAR Appendix 9.5A which is maintained in plant records for the life of the plant.

For information on the current fire protection program requirements established under NFPA 805 refer to the Fire Protection Design Basis Document (DBD-FP-1).
