LISLE, IL 60532-4352

January 13, 2022

Michael Nelson
Radiation Safety Officer
DCS Corporation
6525 Center Drive,
Sterling Heights, MI 48312

SUBJECT: AMENDMENT NO. 09 TO RADIOACTIVE MATERIALS LICENSE FOR DCS
CORPORATION, NRC LICENSE NO. SUB-1603

Dear Mr. Nelson:

Enclosed is Amendment No. 09 to your NRC Materials License No. SUB-1603 in accordance with your request dated October 26, 2021. Specifically, you requested to change the address listed in the license from 7400 Miller Drive, Warren MI 48092 to 6525 Center Drive, Sterling Heights, MI 48312.

You requested to decommission the facility located 7400 Miller Drive, Warren MI 48092. The NRC staff reviewed the information you provided and has concluded that licensable radioactive material has never been stored and used at this location. Therefore, no further remediation or actions are required with respect to this location. Your former authorized facility located at 7400 Miller Drive, Warren, Michigan is suitable for unrestricted use.

An environmental assessment for this action is not required because this action is categorically excluded under Title 10 of the *Code of Federal Regulations* (CFR) Section 51.22(c).

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and

organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice and Procedure," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

Frank P. D. Tran
