Subject: Request to terminate NRC license no. 24-20371-01
Date: Tuesday, November 30, 2021 4:42:00 PM

Good afternoon Mr. Anderson,

I have reviewed your request dated 11/10/21 to terminate the subject NRC license.

In the most recent inspection report dated 9/28/2017, the NRC inspector identified that the licensee possessed a total of 5 gauges.

In your termination request, you provided documentation of leak tests and disposal records for two gauges.

In a signed and dated letter, please provide the leak test results for the other three gauges, if available. Also, please provide documentation of transfer of these gauges to authorized recipients.

If the above documentation is not available, please provide a statement in the letter confirming that no leakage was identified during use of the other three gauges.

Please provide your response by December 15, 2021. You may provide the response directly to me via email.

Please acknowledge receipt of this email and let me know if you have any questions.

Thank you

Magdalena R. Gryglak
