Docket: NRC-2021-0137

Systematic Assessment for how the NRC Addresses Environmental Justice in its Programs, Policies, and Activities

Comment On: NRC-2021-0137-0001

Systematic Assessment for How the NRC Addresses Environmental Justice in Its Programs, Policies, and Activities

Document: NRC-2021-0137-DRAFT-1449

Comment on FR Doc # 2021-14673

Submitter Information

Name: Todd Snyder

Address: United States,

General Comment

The NRC cannot operate in an environmentally just way without acknowledging its past violations of Environmental Justice (EJ) all along the nuclear chain. Most nuclear reactors, uranium mining-milling-“enrichment” facilities, fuel factories, reprocessing, and both high and “low-level” waste sites and transport routes are targeted for or located in/upstream/upwind of low income, rural or inner-city, communities of color.

A next step is to compensate, cleanup, and repair damage done by previous NRC and AEC licensee actions, including over 15,000 abandoned uranium mines and the 1979 Church Rock disaster directly impacting indigenous people. The White House EJ Advisory Committee's list of “PROJECTS THAT WILL NOT BENEFIT A COMMUNITY” includes “procurement of nuclear power.”

To prevent repeating the past, NRC should set up structures to assist EJ communities including

(1) a permanent EJ Advisory Board to assess all NRC processes, with authority to prevent EJ violations and
(2) an independent division of NRC, with a firewall from existing staff, to assist intervenors (similar to current staff support for applicants).

The costs could be part of license application/amendment fees. Fees should also cover costs of

(3) intervenor funding for legal and technical expertise. Canada has intervenor funding.
