SUBJECT: Changes to Site Organization

This letter serves to notify NRC of a change to Holtec Decommissioning International's (HDI) organizational structure at the above-captioned sites. Specifically, HDI is no longer contracting with its subsidiary Comprehensive Decommissioning International, LLC (CDI) to serve as decommissioning general contractor. Instead, HDI is absorbing CDI's resources and will directly employ site personnel to perform day-to-day decommissioning and site maintenance work. This restructuring does not affect the scope, cost, or schedule for decommissioning, nor does it change the personnel who will execute that scope or the resources available to complete it. The change moves licensed activities directly into the licensed operator's organization and results in more streamlined and direct oversight and control of project execution.

The site organizational structure will apply at Palisades and Big Rock Point following the proposed transfer of operational authority from the incumbent operator Entergy Nuclear Operations, Inc. (ENOI) to HDI. HDI and ENOI have supplemented their December 23, 2020 license transfer application for Palisades and Big Rock Point to reflect the new organizational structure (ML22021B670).

This organizational change does not affect the lines of communications between NRC Staff and HDI personnel at the site or corporate level.

There are no regulatory commitments contained within this letter.
