FORM AEC-592 ISSUED TO STEPAN CHEMICAL COMPANY DATED NOVEMBER 21, 1967.  
DOCKET 40-1947

DML:DFH

On November 21, 1967, CO, Region I, issued a Form-592 to the subject licensee alleging the burial of radioactive materials (2.16 million pounds of solid waste containing 1.5% thorium phosphate) in excess of 10 CFR 20 limits. In the back-up notes, the CO inspector indicates that Stepan has discontinued all licensed activities and now plans to request termination of its license. In view of the above and the potential request for license termination, a safety evaluation of the burial will need to be made. Therefore, we would appreciate the opportunity of discussing with you Stepan's reply to the 592 notice in connection with any possible further enforcement action.
