Freedom of Information Act (FOIA) and Privacy Act (PA) Requests, Appeals, and Consultations
Received During the Period of January 17 – January 21, as submitted by requester

Tracking Number	Requester's Name	Requester's Organization	Request Description	Received Date
2022-000060	Kathleen Hooke		All personnel and retirement records under both FOIA and the PA for the named individual who worked at the U.S. Nuclear Regulatory Commission (NRC) in the offices of both human resources and public affairs until her retirement in the early 2000s. In particular, this request covers the retirement and personnel records that show the employee's life insurance election and life insurance beneficiary choice.	01/18/2022
2022-000061	Connie Marini	LightBox	The most recent listing of companies that have been issued an NRC license and are included in the Material Licensing Tracking System Database (active and retired licenses), for the entire United States, to include a record layout	01/18/2022
2022-000062	Connie Marini	LightBox	A list of decommissioning nuclear facilities, which means safely removing a facility or site from service and reducing residual radioactivity to a level that permits either of the following actions, as described	01/18/2022
2022-000063	Robert Leyse		All documents that are relevant to the Thermal Conductivity of Naval Reactor Fuel experiment that was designed, constructed, analyzed, and reported by Oak Ridge National Laboratory with the possibility that others were involved, perhaps at Argonne National Laboratory	01/18/2022

Tracking Number	Requester's Name	Requester's Organization	Request Description	Received Date
2022-000064	Dustin Slaughter		Any and all records pertaining to sightings of Unidentified Flying Objects (UFOs) at or in the vicinity of the Three Mile Island Nuclear Generating Station. This request includes any and all Allegation Receipt Forms, Branch Evaluation, Plan, and Recommendation documents, Corrective Action Program entries, security shift logs, emails, memorandums, camera footage, official reports, bulletins, and any and all other responsive records, from September 2, 1974 to present	01/19/2022
2022-000065	Dustin Slaughter		Any and all records pertaining to sightings of UFOs, also known as Unidentified Aerial Phenomenon (UAP) at or in the vicinity of the Peach Bottom Atomic Power Station, from June 1, 1967 up to and including the date this request is officially processed, to include processing notes related to this request	01/19/2022
2022-000066	Ramona Limani	TCOOO/FWP	All paperwork, reports, cds, storage discs, graphs, charts, articles, emails and memos about Attu, Alaska. I believe it became a nuclear dump site and want to see all records to either prove or disprove this	01/19/2022
2022-000067	Paul Blanch		Copy of email from named individual, sent Monday, April 9, 2012 and addressed to the NRC Chairman, to include enclosures and/or attachments to this cites email	01/20/2022

January 31, 2022

Enclosure B

Tracking Number	Requester's Name	Requester's Organization	Request Description	Received Date
2022-000068	Dustin Slaughter		Any and all records pertaining to sightings of UFOs, also known as UAP at or in the vicinity of the Limerick Generating Station, from June 19, 1974 up to and including the date this request is officially processed	01/20/2022
2022-000069	Dustin Slaughter		Any and all records pertaining to sightings of UFOs, also known as UAP at or in the vicinity of the Susquehanna Steam Electric Station, from November 2, 1973 up to and including the date this request is officially processed	01/20/2022
2022-000070	Niem Tash	Envirosite Corporation	The updated electronic list and details for sites in possession/use of radioactive materials regulated by NRC, all statuses	01/21/2022

ENCLOSURE B

Office of Nuclear Reactor Regulation (NRR)
Items of Interest
Week Ending January 21, 2022

Arizona Public Service Company Submitted the First Exemption Request Using the Risk-Informed Process for Evaluations (RIPE)

On January 14, 2022, Arizona Public Service Company submitted an exemption using the NRC RIPE for the Palo Verde Nuclear Generating Station (PVNGS) (ADAMS Accession No. [ML22014A415](#)). This is the first use of RIPE by a licensee. The proposed action requests an exemption from Title 10 of the *Code of Federal Regulations* Section 50.62(c)(1) to remove the Diverse Auxiliary Feedwater Actuation System from the PVNGS licensing basis. If there are no technical objections or concerns with the submitted application, NRC staff is planning to complete its review with the goal of issuing the exemption by April 15, 2022, consistent with the streamlined review process of RIPE for issues characterized as having a minimal safety impact.

EMBARC Venture Studio Launched Mission Analytics Portal, External (MAP-X)

On January 20, 2022, EMBARK, in collaboration with the Office of Nuclear Security and Incident Response and the Office of the Chief Information Officer, launched the next module for the MAP-X which will allow licensees to submit NRC Form 361, Event Notification Worksheet, electronically. Licensees are still required by regulation to communicate all events directly to the Headquarters Operations Center. This electronic form is intended to simplify communication and data management. Additionally, there is a change in address to access MAP-X from wrr.nrc-gateway.gov to mapx.nrc-gateway.gov to better facilitate the future capabilities of this portal. The initial deployment is focused on event reporting by Part 50 licensees; however, staff intends to expand the capability to other licensee types.

NRC Staff Completed Acceptance Review of National Institute of Standards and Technology License Amendment Request

On January 20, 2022, NRR completed its acceptance review (ADAMS Accession No. [ML22011A073](#)) of the license amendment request (LAR), submitted by the National Institute of Standards and Technology in a letter dated December 23, 2021. The staff concluded that the LAR includes sufficient information for the NRC staff to begin its detailed technical review. The LAR proposes to revise the technical specifications that verify the latching of the fuel elements as part of the corrective actions to the fuel failure event that occurred on February 3, 2021. The NRC staff expects to complete its detailed technical review and make a final determination on the LAR by May 13, 2022.
