Hi Kim, Tom, and Vandana!

Hope you are having a great 2022 up to this point!

As you may already know, we at the U.S. Nuclear Regulatory Commission (NRC) are still working on the review and approval of the 2020 update of the GE Vallecitos Decommissioning Funding Plan (DFP) for the SNM-960 licensed activities (i.e., NRC-DFP). An issue we still need to address to finish this review is the inclusion of 79,163 ft<sup>3</sup> of waste material under the State's DFP (i.e., CA-DFP) that they previously included under the NRC-DFP.

In a response to a request for additional information (RAI) that we issued, they stated that the 79,163 ft<sup>3</sup> of waste material was erroneously included in the 2017 NRC-DFP, which they should not have done, but that it was indeed included in the 2017 CA-DFP. They further stated that CA staff approved that DFP and provided a copy of the approval letter.

With this said, would it be possible if you can provide us a copy of the 2017 CA-DFP that you guys approved?

Let me know if you want to discuss. I appreciate all the assistance you can provide!

Thank you so much!

Osiris Siurano-Pérez

Hi Osiris,

I included Thomas Moore and Vandana Kohli on this email because they are reviewing GE's updated DFP for CA. We are able to join in for a chat. I will be teleworking, but Thomas and Vandana will be in office. Please let us know what number to call or teams/zoom information. Thanks.

Thanks,  
Kim

Hello Osiris,

Kim Sakata is currently handling financial assurance duties here at CDPH-RHB and will be the point of contact for this decommissioning funding plan. I have included her in this email.

Hi Kim, may you please follow up with Osiris regarding the DFP for GE Vallecitos?

Thank you,

**Connor Kubota**

Hi to all!

I am the NRC project manager for the Vallecitos Nuclear Center SNM-960 license.

We are in the final stages of our review of the updated decommissioning funding plan for the NRC materials license for the facility and would like to have a short discussion with you regarding our findings and a couple of issues we have identified in an effort to get our review completed and help you complete yours (for the CA licensed material).

We would like to set up a short call for tomorrow, 11/16/21, at 2:00 PM EST. Would that work?

Thanks!

Osiris Siurano-Perez
