

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

March 4, 2022

Mr. Eric Carr
President and Chief Nuclear Officer
PSEG Nuclear LLC – N09
Hope Creek Generating Station
P.O. Box 236
Hancocks Bridge, NJ 08038

SUBJECT: HOPE CREEK GENERATING STATION AND SALEM NUCLEAR
GENERATING STATION, UNIT NOS. 1 AND 2 – CORRECTION LETTER OF
AMENDMENT NOS. 230, 342, AND 323 RE: DELETION OF SPECIFIED
DEFINITIONS AND FIGURES (EPID L-2021-LLA-0171)

Dear Mr. Carr:

By letter dated February 14, 2022 (Agencywide Documents and Access System (ADAMS) Accession No. ML22012A435), the U.S. Nuclear Regulatory Commission (NRC, the Commission) issued the Amendment Nos. 230, 342, and 323 to Renewed Facility Operating License Nos. NPF-57, DPR-70, and DPR-75 for the Hope Creek Generating Station (Hope Creek), and Salem Nuclear Generating Station, Unit Nos. 1 and 2 (Salem), respectively. The amendments revised the Hope Creek and Salem technical specifications (TSs) to remove TS definitions for Member(s) of the Public, Site Boundary, and Unrestricted Area which are already present in the definitions found in the Offsite Dose Calculation Manual for each site as well as Title 10 of the *Code of Federal Regulations*, Part 20, Section 1003. The amendments also removed figures of the site and surrounding area from the TSs.

The NRC staff has identified an error on one of the Index pages. The page in question is Hope Creek Index page i, and the error is on Section 1.13 – EMERGENCY CORE COOLING SYSTEM (ECCS) RESPONSE TIME. The recently issued Amendment No. 230 shows a page number of “1-2” for this section where the correct page number should be “1-3.”

The NRC staff has concluded that the error was introduced during the preparation of the license amendment. The correction does not change any of the conclusions in the safety evaluation associated with the amendment and does not affect the associated notice to the public.

E. Carr
