Subject: Calvert Cliffs Nuclear Power Plant, Units 1 and 2 - Withdraw of Draft RAI Regarding Proposed Alternative for Various Pressurizer Welds (EPID L-2021-LLR-0037)

Hi Tom,

By email dated February 8, 2022, the U.S. Nuclear Regulatory Commission (NRC) sent a draft request for additional information (RAI) to Constellation Energy Group, LLC (CEG, the licensee) in response to your application dated May 12, 2021, as supplemented by letter dated November 16, 2021 (Agencywide Documents Access and Management System (ADAMS) Accession Nos. ML21133A297 and ML21320A242, respectively). The licensee requested approval of proposed alternative RS 21-056, pursuant to Title 10 of the Code of Federal Regulations (10 CFR) 50.55a(z)(1) to the requirements of the American Society of Mechanical Engineers Boiler and Pressure Vessel Code (ASME Code) for Braidwood Station Units 1 and 2 (Braidwood 1 and 2), Byron Station Units 1 and 2 (Byron 1 and 2), and Calvert Cliffs Nuclear Plant Units 1 and 2 (Calvert Cliffs 1 and 2).

The purpose of this email is to inform the licensee that the NRC has withdrawn this draft RAI for Calvert Cliffs 1 and 2.

The NRC staff is holding a public meeting (ADAMS Accession No. ML22053A171) via webinar on March 4, 2022 at 1:00pm to communicate staff perspectives on risk-informed modification of the Inservice Inspection Program to industry and the public. A revised draft RAI for this proposed alternative may be sent to the licensee following the public meeting.

Docket Nos. 50-317, 50-318

Thank you,
Brent
