NRC Issues Draft Safety Evaluation Report for Subsequent License Renewal Application for Point Beach Nuclear Plant, Units 1 and 2

On February 23, 2022, the staff issued the draft safety evaluation report (SER) ([ML22054A108](#)) associated with the review of the Point Beach Subsequent License Renewal Application (SLRA). NextEra submitted this SLRA for the subsequent renewal of Point Beach Nuclear Plant, Units 1 and 2, to extend Operating License Nos. DPR-24 and DPR-27 for an additional 20 years beyond the current expiration dates of October 5, 2030, for Unit 1; and March 8, 2033, for Unit 2. The overall 18-month review schedule is on track. The next step in the license renewal process is to discuss the SER with the Advisory Committee on Reactor Safeguards Full Committee on April 7, 2022.

NRC Holds Public Outreach Meeting with Nuclear Industry Group to Discuss Concerns Related to Certain Aspects of NRC Staff Interpretation of Regulations Regarding Risk-Informed Categorization and Treatment of Structures, Systems, and Components at Nuclear Power Plants

On February 22, 2022, NRR staff conducted a public meeting with the Nuclear Utility Group on Equipment Qualification (NUGEQ) in response to concerns related to the staff's interpretation of General Design Criteria 4, "Environmental and dynamic effects design basis," and synergistic and aging effects for the categorization and treatment of certain equipment under Chapter 10 of the *Code of Federal Regulations* (10 CFR) Section 50.69. During the meeting, NUGEQ presented their concerns from a letter to the NRC dated December 22, 2021 ([ML22005A127](#)). NRR will review the information and evaluate if Inspection Procedure 37060 requires clarification and provide a response to NUGEQ's concerns.

NRC Holds Quarterly Public Meeting with Technical Specifications Task Force

On February 24, 2022, NRR staff and the industry-led Technical Specifications Task Force (TSTF) conducted a regularly scheduled quarterly public meeting ([ML22041A540](#)). The TSTF presented their "year in review" for 2021, highlighting major accomplishments, including approval of 2 travelers, submission of 5 new travelers, issuance of Revision 5 to the Standard Technical Specifications (NUREG-1430 through NUREG -1434), and approval of 88 license amendments to adopt travelers. The group discussed a clarification requested by the Electric Power Research Institute on revised Technical Specification frequencies for steam generator tube inspections (TSTF-577). The next TSTF quarterly meeting will take place in May 2022.

Revision of Fee Schedules: Fee Recovery for Fiscal Year 2022: Proposed Rule; 10 CFR Parts 170 and 171 [NRC-2020-0031; RIN 3150-AK44]

On February 23, 2022, the NRC published a notice in the *Federal Register* ([87 FR 10081](#)) proposing to amend the licensing, inspection, special project, and annual fees charged to its applicants and licensees. These proposed amendments are necessary to implement the Nuclear Energy Innovation and Modernization Act, which requires the NRC to recover, to the maximum extent practicable, approximately 100 percent of its annual budget less certain amounts excluded from this fee-recovery requirement. In addition, on August 20, 2021, the Chief Financial Officer granted a public interest exemption from the provisions in the fiscal year 2021 final fee rule that required fees for import and export licensing actions. Therefore, this proposed rule would not assess fees for import and export licensing activities in fiscal year 2022. Comments are requested by March 25, 2022.

Public Meeting to Discuss Licensee-Conducted Annual Force-on-Force Exercises

On February 24, 2022, NSIR staff held a public meeting with participants from Entergy, NextEra, Nuclear Energy Institute, Union of Concerned Scientists, and power reactor licensees to discuss licensee-conducted annual force-on-force exercises in Calendar Year 2022. Staff discussed Regulatory Guide 5.75, "Training and Qualification of Security Personnel at Nuclear Power Reactor Facilities," guidance for the conduct of exercises and flexibilities for increased artificialities and simulations implemented to mitigate COVID-19 concerns. The discussion highlighted the need for licensees to document the justification for actions implemented in response to COVID-19 and the expectation for licensees to discontinue the use of those mitigation measures once there is a safe training environment.
