NRC FORM 374 PAGE 1 OF 4 PAGES U.S. NUCLEAR REGULATORY COMMISSION Amendment No. 14 MATERIALS LICENSE Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974 (Public Law 93-438), and Title 10, Code of Federal Regulations, Chapter I, Parts 30, 31, 32, 33, 34, 35, 36, 37, 39, 40, 70 and 71, and in reliance on statements and representations heretofore made by the licensee, a license is hereby issued authorizing the licensee to receive, acquire, possess, and transfer byproduct, source, and special nuclear material designated below; to use such material for the purpose(s) and at the place(s) designated below; to deliver or transfer such material to persons authorized to receive it in accordance with the regulations of the applicable Part(s). This license shall be deemed to contain the conditions specified in Section 183 of the Atomic Energy Act of 1954, as amended, and is subject to all applicable rules, regulations, and orders of the Nuclear Regulatory Commission now or hereafter in effect and to any conditions specified below. Licensee 4. Expiration Date: November 30, 2033 In accordance with letter dated February 25, 2022, 1. South Dakota State University K KE 5. Docket No.: 070-00218 2. P.O. Box 2202 3. License No.: SNM-200 is Reference No.: Brookings, SD 57007-0896 amended in its entirety to read as follows: Byproduct, source, 7. Chemical and/or physical form 6. 8. Maximum amount that licensee 9. Authorized use and/or special nuclear may possess at any one time material under this license A. Plutonium-239/ Beryllium A. Sealed Neutron Source A. 14.7 grams (1 source not A. For use in experiments and demonstrations for student instruction (Monsanto Research Corp., to exceed 1 curie) Model Serial No. M495) and activation analysis of biological and environmental samples. Nn XXXX N

SUPPLEMENTARY SHEET	Amendment No. 14					
CONDITIONS						
10. Licensed material shall be used or stored South Dakota, 57007-0896.	at the licensee's facilities located at Cr	rothers Hall, South Dakota State University, Brooking	js,			
11. Licensed material shall only be used by, Safety Committee Chairperson.	or under the supervision and in the physic	sical presence of, individuals designated by the Radi	iation			
12. The Radiation Safety Officer (RSO) for th	his license is Kevin O'Kelley.	CO				
13. A. Sealed sources and detector cells shall be tested for leakage and/or contamination at intervals not to exceed the intervals specified in the certificate of registration issued by the U.S. Nuclear Regulatory Commission under 10 CFR 32.210 or by an Agreement State. In the absence of a registration certificate, sealed sources shall be tested for leakage and/or contamination at intervals not to exceed 6 months, or at such other intervals as specified.						
B. Not withstanding Paragraph A of this and/or contamination at intervals not	B. Not withstanding Paragraph A of this Condition, sealed sources designed to primarily emit alpha particles shall be tested for leakage and/or contamination at intervals not to exceed 3 months.					
C. In the absence of a certificate from a of registration issued by the U.S. Nuc transfer, a sealed source received from	transferor indicating that a leak test has clear Regulatory Commission under 10 om another person shall not be put into	s been made within the intervals specified in the certi CFR 32.210 or by an Agreement State, prior to the use until tested and the test results received.	ificate			
 D. Sealed sources need not be tested if is 30 days or less; or they contain no microcuries of alpha-emitting materia 	they contain only hydrogen 3; or they c t more than 100 microcuries of beta- an al.	contain only a radioactive gas; or the half-life of the is nd/or gamma-emitting material or not more than 10	otope

- E. Sealed sources need not be tested if they are in storage and are not being used. However, when they are removed from storage for use or transferred to another person, and have not been tested within the required leak test interval, they shall be tested before use or transfer. No sealed source shall be stored for a period of more than 10 years without being tested for leakage and/or contamination.
- F. The leak test shall be capable of detecting the presence of 185 becquerels (0.005 microcuries) of radioactive material on the test sample. If the test reveals the presence of 185 becquerels (0.005 microcuries) or more of removable contamination, a report shall be filed with the U.S. Nuclear Regulatory Commission in accordance with 10 CFR 30.50(c)(2), and the source shall be removed immediately from service and decontaminated, repaired, or disposed of in accordance with Commission regulations.
- G. Analysis of leak test samples and/or contamination shall be performed by persons specifically licensed by the U.S. Nuclear Regulatory Commission or an Agreement State to perform such services. The licensee is authorized to collect leak test samples but not perform the analysis.
- H. Records of leak test results shall be kept in units of becquerels (microcuries) and shall be maintained for 3 years.
- 14. Sealed sources containing licensed material shall not be opened or sources removed from source holders by the licensee, except as specifically authorized.
- 15. The licensee shall conduct a physical inventory every 6 months, or at other intervals approved by the U.S. Nuclear Regulatory Commission, to account for all sealed sources and/or devices received and possessed under the license. Records of inventories shall be maintained for 3 years from the date of each inventory, and shall include the radionuclides, quantities, manufacturer's name and model numbers, and the date of the inventory.
- 16. Except for plutonium contained in a medical device designed for individual human application, no plutonium, regardless of form, shall be delivered to a carrier for shipment by air transport or transported in an aircraft by the licensee except in packages the design of which U.S. Nuclear Regulatory Commission has specifically approved for transport of plutonium by air.

17. Except as specifically provided otherwise in this license, the licensee shall conduct its program in accordance with the statements, representations, and procedures contained in the documents, including any enclosures, listed below. This license condition applies only to those procedures that are required to be submitted in accordance with the regulations. The U.S. Nuclear Regulatory Commission's regulations shall govern unless the statements, representations, and procedures in the licensee's application and correspondence are more restrictive than the regulations.
