Attachments:

Good afternoon Jim,

The proposed updated license conditions provided in your original email below are acceptable to UNC. In addition, we would like to include the condition we discussed regarding minor changes that would not require a license amendment request. We reviewed the examples Doug provided from other licenses and have attached the condition from the Crow Butte license with one proposed change shown in red related to the individuals on the Safety and Environmental Review Panel (SERP). Our team, including the site manager and RSO, are consultants and we would like the flexibility to include them on the SERP subject to NRC's approval. We understand that NRC has allowed this approach in other licenses.

Please let us know if the new license condition can be added and modified as proposed.

Thank you,
Lance

Hey Lance-

I may have missed it, but I can't seem to locate an email from you confirming that the revisions are acceptable to UNC. We'd like to get the SER, Rev.1, into concurrence and we waiting on that confirmation, to be able to reference it in the draft SER.

Thanks

Jim

Subject: [External_Sender] RE: Draft amendment 57 for Church Rock

Hello Jim,

We have reviewed the draft amended license and would appreciate the opportunity to discuss the conditions prior to confirming that they are acceptable to UNC. As we discussed last year, to provide clarity and simplify compliance with the license, we are in the process of preparing a comprehensive LAR that encompasses the revisions provided in the 15 submittals referenced in license condition 34. This approach would allow the license to just reference a single submittal. We are making good progress on the document and would like to review the approach to confirm it's acceptable to NRC. In addition, we would like to discuss some of the requirements related to monitoring and implementing repairs.

Please let me know if you are available for a 1-hour Teams meeting next week during any of the times below and I'll follow up with an invitation.

Thank you,
Lance

3/1 – 10 am to 2 pm

3/2 – 10 am to 1 pm

3/3 – 10 to 11 am

Lance –

We're starting our process of finalizing Rev 1 to the SER. Part of our process is providing a draft version of the amended license (amendment 57) for your review and acceptance of the proposed license conditions. I've attached a draft version of the draft license in track changes mode. The changes are to conditions 30 and 34. Note that these changes increase the number of pages in the license from 8 to 11, so that change, as well as the amendment number, appears on each page of the license.

Note that the conditions have been modified slightly based on what was presented in the initial SER. We've taken your feedback as well as DOE's feedback in making the changes. If you have any questions about the changes, let us know. Also, we can schedule a TEAMS Meeting to walk you through the changes, if you would like.

Please review and confirm in writing (response to this email would be sufficient) that the conditions are acceptable to GE/UNC. A response by March 1 would be appreciated, let me know if you need more time.

Thanks

Jim

Thanks.
