---

Good Afternoon!

Thank you for your participation in the RIC session this morning! Your time, presentations, and insights were greatly appreciated. The work you all are doing is invaluable to the development of non-power and advanced reactors. Thank you again for being flexible with the switch to a virtual conference, we believe we were able to reach a significant audience today!

Please feel free to reach out for any coordination your organization may need with the NRC. If I cannot help you, I will connect you with someone who can.

Best,

Molly-Kate Gavello (she/her)
