Subject: RE: Response to your request for additional info for NRC License No. 21-00741-08, Docket # 030-01995, Mail Control # 628904
Date: Friday, March 04, 2022 4:04:00 PM

Dear Ms. Srinivasan:

Your license is currently authorized for the possession of several sealed sources (Items 6.R. through 6.U.) which were from your liquid scintillation counters for storage waiting for disposal. If the sources will be removed from the counters by your staff, please provide the training and experience for the individual(s) and/or the procedure to approve those individuals by the Radiation Safety Committee including a statement that the manufacturer/vendor instructions and recommendations will be followed. If the sources will be removed from the counters by other authorized NRC or Agreement State licensee, please state.

Please submit the response under a dated and signed cover letter by March 21, 2022. In the cover letter, please refer the license numbers, docket numbers and Mail Control No. 628904. If you have questions, require additional time to respond, or require clarification on any of the information stated above, please contact me at 630-829-9623 or reply to this email.

Thank you,
Frank Tran
