2100 Renaissance Boulevard
Suite 100
King of Prussia, PA 19406-2713

Materials license number 06-35047-01
Docket number: 030-38622

Sir,

I am writing to request a five (5) year extension of our current nuclear materials license, extending the renewal date to May 31, 2028. Connecticut is in the process of becoming an agreement state, and our license renewal date is occurring during their transition. An extension would allow us to renew with CT and not have to renew with the NRC and then re-license with CT shortly thereafter once they are completely transitioned. Thank you for your consideration.
