Laramie, WY 82070

SUBJECT: TERMINATION OF NRC RADIOACTIVE MATERIALS LICENSE NO. 49-29281-01

By electronic communication dated February 28, 2022, Mr. Dru Burr of your staff informed the U.S. Nuclear Regulatory Commission (NRC) that Coffey Engineering & Surveying, LLC, wished to terminate NRC radioactive materials license number 49-29281-01. The NRC Form 314 dated February 21, 2022 stated that all radioactive material had been returned to a licensed device manufacturer for disposal.

In support to the license termination request you provided a copy of the most recent leak test result showing that there was no evidence of leakage of radioactive material from the sealed sources contained in the device. Based on the documentation submitted and a review of your historical file, the staff concluded that all licensable radioactive material has been removed from your facility located at 902 South 3rd Street, Laramie, Wyoming. This facility is suitable for unrestricted use in accordance with 10 CFR 20.1402, "Radiological Criteria for Unrestricted Use." Based on these conclusions, no further remediation or actions with respect to NRC regulated material is required.

Please find enclosed Amendment No. 5 to license number 49-29281-01 authorizing license termination. An environmental assessment for this action is not required since this action is categorically excluded under 10 CFR 51.22(c)(20)(ii).

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

You can contact me at 817-200-1189 if you have questions about the content of this letter.

Sincerely,

Roberto J. Torres, M.S., Senior Health Physicist
Materials Licensing Branch
