REGION III
2443 WARRENVILLE RD. SUITE 210
LISLE, IL 60532-4352

March 25, 2022

Michael A. Schmidt, M.D.
Radiation Safety Officer
North Ottawa Community Hospital
1309 Sheldon Road
Grand Haven, MI 49417

Dear Dr. Schmidt:

Enclosed is Amendment No. 27 renewing your NRC Material License No. 21-13963-01 in accordance with your request.

Your license has been renewed for a 15 year term and will not expire until March 31, 2037.

This amendment was prepared using our new Web Based Licensing System (WBL). This has resulted in changes to your license, including the deletion of Condition Nos. 13 and 14, as they appeared on Amendment No. 26, and the addition of an ADAMS accession number to the document listed in newly reordered Condition No. 13.

ADAMS is the NRC's electronic document system. More information on ADAMS, which NRC has been using since 1999, can be found on our website at: <https://www.nrc.gov/reading-rm/adams.html>.

10 CFR Part 71, while no longer referenced by former Condition No. 14 on your license, is now included by reference in the Preamble language at the top of page 1 of your license.

Former Condition No. 13 was no longer necessary for your license.

If you have any questions or comments please contact me at either (800) 829-9500, ext. 9841 or (630) 829-9841. My fax number is (630) 515-1078. My email address is colleen.casey@nrc.gov.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you.

This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions.

Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture.

You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>.

We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

Sincerely,

Colleen Carol Casey
Materials Licensing Branch
