Good morning Larry,

The U.S. Nuclear Regulatory Commission (NRC) is preparing to issue a license amendment for Beaver Valley Power Station, Units 1 and 2. In accordance with Title 10 of the Code of Federal Regulations, Section 50.91(b), I am notifying you of the proposed issuance of this amendment.

Please reply if the State of Pennsylvania has comments on the following requested licensing action submitted to the NRC by Energy Harbor Nuclear Corp. (the licensee), "Request for an Amendment to Adopt TSTF-577-A, Revision 1, Revised Frequencies for Steam Generator Tube Inspections" by letter dated September 15, 2021, as supplemented by letter dated February 4, 2022, (Agencywide Document and Access Management System (ADAMS) Accession Nos. ML21258A319 and ML22035A122, respectively). The proposed changes would revise the "Steam Generator (SG) Program" and the "Steam Generator Tube Inspection Report" TSs based on Technical Specifications Task Force (TSTF) Traveler TSTF-577, Revision 1, "Revised Frequencies for Steam Generator Tube Inspections" (TSTF-577) (ADAMS

Accession No. ML21060B434), and the associated NRC staff safety evaluation (SE) of TSTF-577 (ADAMS Accession No. ML21098A188).

The proposed no significant hazards consideration for this amendment request was published in the Federal Register on February 22, 2022 (87 FR 9651).

Please respond with comments, if any, by April 13, 2022.

Thank you,  
Brent

Brent Ballard
