Subject: Oklo Inc. Licensing Project Plan

Oklo Inc. (Oklo) is submitting to the U.S. Nuclear Regulatory Commission (NRC) a licensing project plan as Enclosure 2 to this letter. The plan is intended to follow conversations with NRC staff and management regarding identifying next steps in regulatory engagement, and is submitted to support planning and alignment with the NRC on reports, meetings, and other pre-application items.

Oklo submitted its first licensing project plan in 2017, as the first to engage with the NRC on such a plan in pre-application, and found regular NRC engagement on pre-application planning extremely beneficial. In addition, the NRC showed a strong path forward by piloting the “core team” concept with Oklo, which helped ensure maximum staff continuity and therefore review efficiency throughout pre-application work to date. This type of engagement is essential to ensuring continued successful reviews of advanced fission, which will be critical as the nation looks towards nuclear to meet its clean energy goals. Oklo is excited to continue on this foundation built with NRC staff through engagement with the NRC on key topics, especially with the renewed possibility to engage in in-person engineer-to-engineer meetings as previously planned.

In keeping with standard practice for licensing project plans and other non-technical planning documents, Oklo requests that Enclosure 2 be withheld in its entirety from public disclosure pursuant to 10 CFR §2.390, due to including detailed confidential and proprietary business information and strategy.

If you have any questions or need any additional information, please contact us at [regulatory@oklo.com](mailto:regulatory@oklo.com) or (650) 550-0127.

Sincerely,

A handwritten signature in black ink, appearing to read "Ross Moore".

Ross Moore  
Director of Regulatory Affairs  
Oklo Inc.

Enclosure: (1) Affidavit  
(2) Oklo Inc. Licensing Project Plan

CC (with enclosure):
