Project No. 99902069

US Nuclear Regulatory Commission  
ATTN: Document Control Desk  
Washington, DC 20555-0001

Subject: Kairos Power LLC  
Topical Report Submittal  
KP-FHR Mechanistic Source Term Methodology Topical Report, Revision 3

References: 1. Letter, Kairos Power LLC to Document Control Desk, "Topical Report Submittal, KP-FHR Mechanistic Source Term Methodology Topical Report, Revision 2," February 16, 2022, ML22047A326

Kairos Power submitted Revision 2 of the subject topical report for Nuclear Regulatory Commission (NRC) staff review on February 16, 2022 (Reference 1). That report was found to have erroneously redacted information that had previously been made publicly available. (The erroneous redaction was subsequently determined to have been the result of an administrative oversight.) This letter transmits Revision 3 of the topical report to correct the withholding.

Portions of the attached report are considered proprietary, and Kairos Power requests they be withheld from public disclosure in their entirety in accordance with the provisions of 10 CFR 2.390. Enclosure 1 provides the proprietary version of the report and Enclosure 2 provides the non-proprietary report. An affidavit supporting the withholding request is provided in Enclosure 3.

Additionally, the information indicated as proprietary has also been determined to contain Export Controlled Information. This information must be protected from disclosure pursuant to the requirements of 10 CFR 810.

If you have any questions or need any additional information, please contact Drew Peebles at [peebles@kairospower.com](mailto:peebles@kairospower.com) or (704) 275-5388, or Darrell Gardner at [gardner@kairospower.com](mailto:gardner@kairospower.com) or (704) 769-1226.

Sincerely,

Peter Hastings, PE  
Vice President, Regulatory Affairs and Quality

KP-NRC-2203-009

- 2) KP-FHR Mechansitic Source Term Methodology, Revision 3 (Non-proprietary)
- 3) Affidavit Supporting Request for Withholding from Public Disclosure (10 CFR 2.390)

xc (w/enclosure):

William Kennedy, Acting Chief, NRR Advanced Reactor Licensing Branch

Samuel Cuadrado de Jesus, Project Manager, NRR Advanced Reactor and Licensing Branch

Benjamin Beasley, Project Manager, NRR Advanced Reactor and Licensing Branch

**Enclosure 3**

**Kairos Power LLC Affidavit and Request for  
Withholding from Public Disclosure (10 CFR 2.390)**

I, Peter Hastings, hereby state:

1. I am Vice President, Regulatory Affairs and Quality, at Kairos Power LLC (“Kairos”), and as such I have been authorized by Kairos to review information sought to be withheld from public disclosure in connection with the development, testing, licensing, and deployment of the Kairos reactor and its associated structures, systems, and components, and to apply for its withholding from public disclosure on behalf of Kairos.
2. The information sought to be withheld, in its entirety, is contained in Kairos’ Enclosure 1 to this letter.
3. I am making this request for withholding, and executing this affidavit in support thereof, pursuant to the provisions of 10 CFR 2.390(b)(1).
4. I have personal knowledge of the criteria and procedures utilized by Kairos in designating information as a trade secret, privileged, or as confidential commercial or financial information. Some examples of information Kairos considers proprietary and eligible for withholding under §2.390(a)(4) include:
  - a. Information which discloses process, method, or apparatus, including supporting data and analyses, where prevention of its use by Kairos competitors without license or contract from Kairos constitutes a competitive economic advantage over other companies in the industry;
  - b. Information, which if used by a competitor, would reduce his expenditure of resources or improve his competitive position in design, manufacture, shipment, installation, assurance of quality;
  - c. Information which reveals cost or price information, production capacities, budget levels, or commercial strategies of Kairos, its customers, its partners, or its suppliers;
  - d. Information which reveals aspects of past, present, or future Kairos or customer funded development plans or programs, of potential commercial value to Kairos;
  - e. Information which discloses patentable subject matter for which it may be desirable to obtain patent protection; and/or
  - f. Information obtained through Kairos actions which could reveal additional insights into reactor system development, testing, qualification processes, and/or regulatory proceedings, and which are not otherwise readily obtainable by a competitor.
5. Kairos’ information contained in Enclosure 1 to this letter contains details of Kairos’ mechanistic source term methodology for a Kairos Power fluoride salt-cooled high-temperature reactor. These details could provide a competitor with a commercial advantage if the information were to be revealed publicly.

6. Pursuant to the provisions of §2.390(b)(4), the following is furnished for consideration by the Commission in determining whether the information sought to be withheld from public disclosure should be withheld:
- a. The information sought to be withheld from public disclosure is owned and has been held in confidence by Kairos.
  - b. The information is of a type customarily held in confidence by Kairos and not customarily disclosed to the public. Kairos has a rational basis for determining the types of information customarily held in confidence by it and, in that connection, utilizes a system to determine when and whether to hold certain types of information in confidence. The application of that system and the substance of that system constitute Kairos policy and provide the rational basis required.
  - c. The information is being transmitted to the Commission in confidence and, under the provisions of 10 CFR 2.390, it is to be received in confidence by the Commission.
  - d. This information is not readily available in public sources.
  - e. Public disclosure of this proprietary information is likely to cause substantial harm to the competitive position of Kairos, because it would enhance the ability of competitors to provide similar products and services by reducing their expenditure of resources using similar project methods, equipment, testing approach, contractors, or licensing approaches. This information is the result of considerable expense to Kairos and has great value in that it will assist Kairos in providing products and services to new, expanding markets not currently served by the company.
  - f. The information could reveal or could be used to infer price information, cost information, budget levels, or commercial strategies of Kairos.
  - g. Each component of proprietary information pertinent to a particular competitive advantage is potentially as valuable as the total competitive advantage. If competitors acquire components of proprietary information, any one component may be the key to the entire puzzle, thereby depriving Kairos of a competitive advantage.
  - h. Unrestricted disclosure would jeopardize the position of Kairos in the world market, and thereby give a market advantage to the competition in those countries.

I declare under penalty of perjury that the foregoing is true and correct.

Executed on: March 28, 2022

Peter Hastings

Vice President, Regulatory Affairs and Quality
