

FEMA

January 20, 2022

Mr. Scott Morris
Regional Administrator
U.S. NRC, Region IV
1600 East Lamar Boulevard
Arlington, TX 76011-4511

Dear Mr. Morris:

Enclosed is a copy of the radiological emergency preparedness final report for the Arkansas Nuclear One (ANO) Medical Services Drill that was virtually evaluated on October 13, 2020 and November 18, 2021. FEMA Region 6 staff evaluated the drill at the St. Mary's Hospital and Pope County Emergency Medical Services, Main Station in Russellville, Arkansas. There were no Level 1 Findings, however there was one Level 2 Finding that was identified and corrected during the drill. No Plan Issues were identified.

Based on the results of the drill, the planning and preparedness for the State of Arkansas and affected local jurisdictions provide reasonable assurance that appropriate measures can be taken to protect public health and safety in the event of a radiological release. Therefore, 44 CFR Part 350 approval of the offsite radiological emergency response plans and preparedness for the State of Arkansas, specific to Arkansas Nuclear One, will remain in effect.

A copy of this report was mailed to the NRC Headquarters Document Control Desk and a copy was transmitted electronically to RIV_FEMADistribution@NRC.gov as specified in the FEMA REP Program Manual dated January 2016.

Should you have questions, please contact Elsa Lopez, Senior Site Specialist for the Arkansas Nuclear One site, at (940) 898-5308 or (940) 367-5588.

Sincerely,

OSCAR
MARTINEZ JR
Oscar Martinez
