LISLE, ILLINOIS 60532-4352

April 4, 2022

Mr. Terry Brown
Site Vice President
Energy Harbor Nuclear Corp.
Davis-Besse Nuclear Power Station
5501 N. State Rte. 2, Mail Stop A-DB-3080
Oak Harbor, OH 43449-9760

SUBJECT: DAVIS-BESSE NUCLEAR POWER STATION, UNIT 1 - INFORMATION REQUEST
FOR AN NRC POST-APPROVAL SITE INSPECTION FOR LICENSE RENEWAL
05000346/2022012

Dear Mr. Brown:

On June 6, 2022, the U.S. Nuclear Regulatory Commission (NRC) will begin a Post-Approval Site Inspection for License Renewal at Davis-Besse Nuclear Power Station. This inspection will be performed in accordance with NRC Inspection Procedure 71003. This Phase 3 inspection will focus on the station actions related to commitments not closed during the Phase 2 license renewal inspection (05000346/2017009).

In order to minimize the inspection impact on the site and to ensure a productive inspection for both parties, we have enclosed a request for information needed for the inspection. It is important that all of these documents are up to date and complete in order to minimize the number of additional documents requested during the preparation and/or the onsite portions of the inspection. Insofar as possible, this information should be provided electronically to the lead inspector. These documents have been divided into two groups.

The first group identifies information necessary to ensure that each inspector is adequately prepared. The second group identifies the information that each inspector will need throughout the inspection.

During the in-office preparation activities, the team will identify as much as possible the information and activities to be reviewed during the inspection. This information should be provided to the lead inspector by May 23, 2022.

The lead inspector for this inspection is Mr. J. Bozga. We understand that our licensing contact for this inspection is Ms. G. Ellithorpe of your organization. If there are any questions about the inspection or the material requested in the enclosure, please contact the lead inspector at 630-829-9613.

This letter does not contain new or amended information collection requirements subject to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.). Existing information collection requirements were approved by the Office of Management and Budget, Control Number 3150-0011. The NRC may not conduct or sponsor, and a person is not required to respond to a request for information or an information collection requirement unless the requesting document displays a currently valid Office of Management and Budget Control Number.

In accordance with Title 10 of the Code of Federal Regulations (10 CFR) 2.390, "Public Inspections, Exemptions, Requests for Withholding," of the NRC's "Rules of Practice," a copy of this letter, its enclosure, and your response (if any) will be available electronically for public inspection in the NRC's Public Document Room or from the Publicly Available Records (PARS) component of the NRC's Agencywide Documents Access and Management System (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

Sincerely,

Signed by Bozga, John
on 04/04/22

John V. Bozga, Senior Reactor Inspector
Engineering Branch 1
Division of Reactor Safety

I. Information Requested Prior to the Onsite Inspection Week on May 23, 2022.

The following information (electronic copy) is requested by May 23, 2022, or sooner, to facilitate inspection preparation. Each inspector will select specific items from the information requested below and may request a list of additional documents needed to complete the inspection. We request that the specific items selected be available and ready for review. If you have any questions regarding this information, please call the inspector as soon as possible.

1. Provide (if applicable) aging management program documents, drawings, plant procedures, work orders, design calculations, industry guidance documents, inspection results, engineering reports/evaluations, technical reports, specifications, engineering changes, commitment changes, updated safety analysis report change reports and corrective action documents associated with the closure of open commitments Nos. 12, 20, 21, 37, 42, 51, and 53 identified during the Phase II inspection (05000346/2017009)
2. Provide current management and license renewal organizational charts.
3. Provide electronic copies of Updated Final Safety Analysis Report, Technical Specifications, Technical Specifications Bases, and Technical Requirements Manual.
4. Provide copies of any internal/external self-assessments and associated corrective action documents generated in preparation for the inspection.

II. Information Requested to be Provided Throughout the Inspection

1. Copies of any corrective action documents generated as a result of the team’s questions or queries during this inspection.
2. Copies of the list of questions submitted by the team members and the status/resolution of the information requested (provide daily during the inspection to each team member).

If you have questions regarding the information requested, please contact the lead inspector.
