April 7, 2022

Kelly Wegener-Gave
The Dow Chemical Company
Michigan Operations
Midland, MI 48674

SUBJECT: TERMINATION OF RADIOACTIVE MATERIALS LICENSE FOR DOW CORNING CORPORATION, NRC LICENSE NO. 21-08362-08

Dear Mr. Wegener-Gave:

In letter dated January 24, 2022, you notified the U.S. Nuclear Regulatory Commission (NRC) of a request to terminate NRC Materials License No. 21-08362-08. Your letter is available electronically from the Agencywide Documents Access and Management System (ADAMS) at Accession No. ML22040A021.

The NRC staff has reviewed your final status surveys. Based on its review, the NRC staff has concluded that all licensable radioactive material has been removed from the facility and residual radioactive material attributable to licensed activities does not exceed current NRC criteria.

Based on these conclusions, no further remediation or actions are required with respect to NRC-regulated material. Your facilities are suitable for unrestricted use, and NRC Materials License No. 21-08362-08 is hereby terminated. (See Enclosure for the amended license stating that the license is terminated.)

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice and Procedure," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's ADAMS, accessible from the NRC Web site at <https://www.nrc.gov/reading-rm/adams.html>.

If you have questions, please contact me at 630-829-9870 or peter.lee@nrc.gov.

Sincerely,

Peter J. Lee, Ph.D., CHP
Health Physicist
Materials Licensing Branch

Docket No.: 030-04858
License No.: 21-08362-08
Control No.: 630031

Enclosure: Amendment No. 35 to NRC License No. 21-08362-08 Stating that the License is Terminated
