Subject: [External_Sender] RE: Bond release request: Bond [REDACTED]

Hello –

Attached is written confirmation from the State of Wyoming that they have accepted ExxonMobil's bond associated with the former Highland Uranium Mine.

I request the NRC release bond [REDACTED] (further details in trailing email below).

Please let me know if any additional information is requested at this time.

Thank you

External Email - Think Before You Click

Hello Mr. Grapski

I am no longer the Project manager for the site, but have passed your email on to him and the folks in our financial group. I have cc'ed them on this email so you have their direct contact information. We will need to get written confirmation from the State of Wyoming that they have satisfactory financial assurance named in their favor in place for this site. Once NRC receives

this letter from the state, we can cancel the NRC instrument, and send you the letter and the instrument.

Thanks
Nick Orlando

Subject: [External_Sender] Bond release request: Bond [REDACTED]

Mr. Orlando:

The Wyoming Dept. of Environmental Quality has become an Agreement State and taken over all oversight requirements for License SUA-1139 at the ExxonMobil Highland Uranium Mine. The Nuclear Regulatory Commission is no longer a license holder and thus should formally release of bond [REDACTED]. A formal notice on NRC letterhead similar to the template attached is required in order to release the bond.

Details:

Bond #: [REDACTED]
Principal: ExxonMobil Oil Corporation
Obligee: United States Nuclear Regulatory Commission
Surety: Federal Insurance Company
Bond total: \$2M USD
Bond Description: Pending Release – Reclamation Bond to Cover the Reclamation, Decommissioning, Stabilization and Long-Term Surveillance of the Highland Uranium Operations Tailings Basin.

Please let me know if you have any questions or would like to discuss further.

Thank you
