

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

May 20, 2022

Mr. Bob Coffey
Executive Vice President, Nuclear
and Chief Nuclear Officer
Florida Power & Light Company
Mail Stop: EX/JB
700 Universe Boulevard
Juno Beach, FL 33408

SUBJECT: DUANE ARNOLD ENERGY CENTER - CORRECTION TO THE RENEWED
FACILITY OPERATING LICENSE TO REFLECT LICENSE CONDITIONS
REMOVED BY PREVIOUS LICENSE AMENDMENTS

Dear Mr. Coffey:

The U.S. Nuclear Regulatory Commission (NRC) staff is reissuing the attached Page Nos. 3 and 4 for the NextEra Energy Duane Arnold, LLC (NEDA) Duane Arnold Energy Center (DAEC) Renewed Facility Operating License No. DPR-49 (DAEC License). The reissued license pages correct for the previous inadvertent removal of License Condition 2.C.(8), regarding changes to the Updated Final Safety Analysis Report; License Condition 2.C.(9), regarding mitigation strategy; and License Condition 2.C.(10), regarding compliance with NRC Order EA-06-137, from the DAEC License.

These three license conditions were evaluated and approved by the NRC for removal from the DAEC License by Amendment No. 314 and Amendment No. 315. Amendment No. 314 was issued by the NRC on May 13, 2021 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML21067A642); Amendment No. 315 was issued by the NRC on January 21, 2022 (ADAMS Accession No. ML21172A217). However, the three license conditions were inadvertently reintroduced into the DAEC License with the amendment pages the NRC issued to accompany Amendment No. 316 and Amendment No. 317 to the DAEC License. Amendment No. 316 was issued by the NRC on February 3, 2022 (ADAMS Accession No. ML22028A282); Amendment No. 317 was issued by the NRC on March 10, 2022 (ADAMS Accession No. ML22059A746).

The inclusion of these three license conditions in the DAEC license pages issued with Amendment No. 316 and Amendment No. 317 was an administrative error on the part of the NRC staff and does not reflect the current licensing basis or associated conditions applicable to the DAEC facility at this stage in the decommissioning process (i.e., all spent fuel removed from the DAEC spent fuel pool and stored within the onsite independent spent fuel storage installation (ISFSI)). As such, Page Nos. 3 and 4 of the DAEC License are being reissued to correct this administrative error.

The removal of License Conditions 2.C.(8), 2.C.(9), and 2.C.(10) from the DAEC License is administrative in nature to remedy a previous error introduced by the NRC staff. The corrected version of Page Nos. 3 and 4 of the DAEC License is attached and reflects the information that should have been issued by the NRC as part of the pages issued with Amendment No. 317 to the DAEC License. Replacement of the current Page Nos. 3, 4, and 5 of the DAEC License with the attached corrected pages will ensure that the facility has a correct and current license document.

In accordance with 10 CFR 2.390 of the NRC's "Agency Rules of Practice and Procedure," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records component of NRC's ADAMS. ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

If you or your staff have any questions regarding the above, please contact me at 301-415-3178 or via email at marlayna.doell@nrc.gov

Sincerely,

Signed by Doell, Marlayna
on 05/20/22

Marlayna V. Doell, Project Manager
Reactor Decommissioning Branch
