Subject: Extension Request for NRC Broad Scope License Renewal Date

To Whom It May Concern:

The University of Connecticut's broad scope radioactive materials license #06-01450-47 was last renewed in 2016. At that time, licenses were renewed every ten years, so it is currently scheduled for renewal on June 30, 2026. Due to licenses now being granted for 15-year periods, we request that our renewal date be extended to June 30, 2031.

Please accept this request to extend the University's broad scope materials license #06-01450-47 to June 30, 2031, and please inform the University of your decision. If you require additional information or the University can provide further assistance, please contact Amy Courchesne, RSO, by telephone at (860) 486-5399 or at the mailing address below.

Sincerely,

Wesley G Byerly Digitally signed by Wesley G Byerly
