**SUBJECT: DUPONT SPECIALTY PRODUCTS, USA, LLC, REQUEST FOR ADDITIONAL INFORMATION, MAIL CONTROL NO. 629185**

Dear Mr. Archibald:

This is in reference to the letter dated September 23, 2021, providing an updated decommissioning funding plan and the Surety Bond rider received March 30, 2022. This also refers to Amendment No. 31 of your license, issued January 24, 2022, which reduced possession limits such that a decommissioning funding plan is no longer required. The possession limits of Amendment No. 31 require only the amount of financial assurance described in 10 CFR 30.35(d); the Surety Bond Rider provides the correct amount. Please note that, because you no longer require a decommissioning funding plan, there is no need to revise the financial assurance unless you increase the limits of the current license.

However, in order to continue our review of your financial assurance, we need the following additional information:

1. Provide updated Schedules A, B and C to the Standby Trust Agreement, and an updated Specimen Certificate of Events. These should reflect the current amount of financial assurance required, and the current location of use on the license.
2. Provide an updated Certification of Financial Assurance for the current authorized materials, current authorized location, and current amount of financial assurance. This should be an originally signed duplicate submitted as a hard copy document. A pdf copy of the signed document may be submitted by electronic mail.

We will continue our review upon receipt of this information. You may provide electronic copies attached to an email to [Elizabeth.Ullrich@nrc.gov](mailto:Elizabeth.Ullrich@nrc.gov).

In order to continue prompt review of your application, we request that you submit your response to this letter within 30 calendar days from the date of this letter.

An electronic version of the NRC's regulations is available on the NRC Web Site at: [www.nrc.gov](http://www.nrc.gov). Additional information regarding use of radioactive materials may be obtained on the NRC Web Site at: <http://www.nrc.gov/materials/miau/mat-toolkits.html>. This site also

provides the link to the toolbox for updated information on the revised regulations for naturally-occurring and accelerator-produced radioactive materials (NARM).

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web Site at: <http://www.nrc.gov/reading-rm/adams.html>. Please be aware that you may request that certain portions of your submittal to NRC be withheld from public disclosure as proprietary information. To do this, you must execute an affidavit as specified in 10 CFR 2.390. You must list all portions that you wish to be held proprietary, along with your reasoning as to why that is appropriate. While it is allowable, please refrain from submitting proprietary information in support of a license unless necessary. Keep in mind that all NRC licenses are considered to be in the public domain, and therefore may be viewed by any member of the public who requests to see them.

If you have any questions regarding this request for additional information, please contact me at (610) 337-5040 or by electronic mail to [Elizabeth.Ullrich@nrc.gov](mailto:Elizabeth.Ullrich@nrc.gov).

Thank you for your cooperation.

Sincerely,

Betsy Ullrich, Senior Health Physicist  
Commercial, Industrial, R&D  
and Academic Branch  
Division of Radiological Safety and Security
