

<u>RAI Response</u>	<u>Clarification Requested</u>
Proposed Action – 1	Clarify the process used in determining the final disposal site for processed wastes.
Proposed Action – 3	Clarify where the water wastes would be received from, and how processed at the MVF and where transported to for final disposition.
Proposed Action – 4	Provide examples of the hand tools that would be used. Clarify if the heavy equipment (forklift, excavator, crane) would be kept at the MVF site or leased as needed.
Alternative – 2	Clarify if USE-I would continue to use the site for its needs, and if so, clarify the expected level of USE-I's use.
Land Use – 1	Provide a legend for the map or provide additional information to clarify the land use shown in the map.
Transportation – 1	Provide the reason(s) for the same volume of drum waste in the table for the five years shown.
Water Resources – 1 Ecological Resources – 1	Clarify the changes to be made to the site to accommodate the planned MVF activities (i.e., for administrative needs, redeployment of existing structures).
Historical & Cultural – 1	Clarify if Qal-Tek's planned activities would fall under the Elmore County conditional use permit granted to USE-I or if Qal-Tek would need to seek a new conditional use permit for its activities.
Socioeconomics – 1	Clarify number of full-time employees expected at MVF (text and organizational chart don't match).
Public & Occupational Health – 1	Clarify if Qal-Tek's planned use of active and passive air sampling would be in lieu of USE-I's air permitting exemption from the State of Idaho.
Public & Occupational Health – 2	Clarify definition for "Controlled Storage Area" as application currently only has "Controlled Area" definition.
Waste Management – 1	Clarify the process to be used in determining the final disposal location for residual wastes at the MVF.
